

Treatment and Services

Gold Series Water Softener & Whole House Filter

This full-featured water softener is great for any size home. The 1" valve allows you to run numerous water fixtures simultaneously without any loss of water pressure. Exclusive, non-corrosive piston driven control valve for years of reliable service. Culligan's exclusive Quadra-Hull® tank with limited lifetime warranty. Culligan's Soft-Minder® meter monitors water use and will activate regeneration only when needed.

Computer control prevents service issues, extends the life of the system, and keeps settings during power outages.

Whole House Filtration systems are also available.

Iron & Sulphur Treatment

The Sulfur-Clear Whole House Filter features Culligan's patented filtration process that oxidizes the hydrogen sulfide in your water and gets rid of that sulfurous rotten egg smell. The exclusive filter technology in the Sulfur-Clear Whole House Filter is so advanced, it also reduces iron from your water. So you'll finally be able to enjoy clean, clear water with no odors or annoying rust stains. You'll get nothing but perfect, filtered, Culligan water that will make a big difference all over the house

Pond Water Treatment System

Culligan of Northwest Ohio is state certified for the installation of pond water systems. Our systems and installations are in compliance with all local and state guidelines. Our sales technicians are also state certified. Culligan offers standard pond packages and total pond systems which include everything from the floating pond filter to the absolute 1 micron filter. Sales technicians are capable of inspecting the site, which includes but is not limited to; Placing outlets, amps for outlets, floor space needed, draining access and yearly maintenance plans. It is important to preplan for a pond system when designing your basement.

Product Delivery

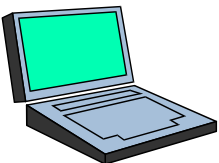

We offer a delivery service to fit your needs. The regular routes repeat every four weeks. They could be more or less frequent depending on your requirements. We can deliver any of our products such as Bottled Water, Cups, Salt, Hydrogen Peroxide, Bleach, Filters, Coffee & Tea, and more. We will send you a route calendar letting you know exactly what days the delivery truck will be in your area.

Service - All Brands

If you have problems with your equipment or need a filter change, we have a trained staff of service technicians that will be able to diagnose your problem and repair it, or explain the system and its capabilities. *We service all brands of water softeners.*

Drinking Water Options

Aqua-Clear Advanced Drinking Water System

- 13 unique filters available - to customize the system to local water conditions
- Several specialty filters available to target specific water quality concerns like VOC's (organic chemicals, such as Trihalomethanes or TTHM's), MTBE (methyl tertiary-butyl ether, a chemical compound that is manufactured by the chemical reaction of methanol and isobutylene), and Arsenic.
- Easy to maintain
- You get water that's every bit the equal of bottled water - at just pennies a gallon.
- Faucet-based LED monitoring system tells you that the Aqua-Clear System is working
- Exclusive Culligan technology

Culligan Aqua-Clear CC Custom

This model provides the ultimate in flexibility. It has three AquaClear filter heads inside that accept the new Aqua-Clear cartridges. It is the best choice for RO applications. Optionally, the new 4 position Aqua-Clear drinking water system can be mounted on the back. A large internal reservoir eliminates the need for a separate RO storage tank. A leak detector and shut off is also a standard feature on this new cooler.

This system includes a large storage reservoir inside, making it the best choice for applications requiring reverse osmosis or nanofiltration.

Culligan Bottled Water Service

Culligan provides refreshing, great tasting bottled water service for both your **home** and your **business**.

All five gallon bottles feature our trademark Care Cap® to make handling easy and eliminate spills when changing bottles. We fully service our high-quality water coolers to make sure they are always working to your satisfaction. We also provide disposable drinking water cups for use by your family, guests, or employees.

You can also receive handy single-serve bottles, delivered by the case, to enjoy delicious water on the go.
